

```
var Matriz= ['Nombre', 1, true]
```

[0] [1] [2]

[0]	'Nombre'	1	true
-----	----------	---	------

Las Matrices (Arrays) puede contener Strings, Números y Booleanos.

```
var Arreglo= [2,4,6,8]
```

[0] [1] [2] [3]

[0]	2	4	6	7
-----	---	---	---	---

Las Matrices (Arrays) puede contener Strings, Números y Booleanos.

```
var Array = [[1,2,3], [4,5,6], [7,8,9]];
```

[0] [1] [2]

[0]	1	4	7
[1]	2	5	8
[2]	3	6	9

Matriz (Array) con lista de Matrices (Arrays).

```
var Array= [[1,2,3], [4,5,6], [7,8,9]];
```

```
console.log(Array[0]);
```

[0] [1] [2]

[0]	1	4	7
[1]	2	5	8
[2]	3	6	9

Ejemplo para acceder al valor del elemento indexado en la posición [0] de Array.

```
var Array = [[1,2,3], [4,5,6], [7,8,9]];
```

```
console.log(Array[0][1]);
```

[0] [1] [2]

[0]	1	4	7
[1]	2	5	8
[2]	3	6	9

Ejemplo para acceder al valor indexado en en índice [0] en la posición [1] la variable Array.

Matrices

```
var mat = [1,2,3,4,5];
```

Índice →	0	1	2	3	4
Valor →	1	2	3	4	5
	mat [0]	mat [1]	mat [2]	mat [3]	mat [4]
